

Jsonpage at a glance

The fixed-price company record API: 14 countries, one JSON format. Published by Devintech.

What Jsonpage does

- Look up a company by identifier or by name, in every country served.
- Autocomplete for forms, and validation of an identifier, a SIRET and a VAT number in one call.
- Verified VAT number with its status, legal notices and insolvency signals.
- Indicative sanctions screening.
- Monitoring: every change becomes an event, delivered by signed webhook and by e-mail.
